HP OpenView Storage Mirroring Packaged Demonstration

DESCRIPTION

A Partner Services consultant will demonstrate a typical HP OpenView Storage Mirroring environment consisting of standard file servers as replication partners.

DELIVERABLES

Demonstration of the following:

- Overview of the HP OpenView Storage Mirroring graphical user interface
- Options available when creating replication sets
- How to create and enable replication sets
- File server failover in the event of a disaster
- The user experience when servers and shares are failed over

CUSTOMER BENEFITS

- The customer will benefit from the technical experience and expertise in a guided demonstration
- The customer will have confidence they can proceed with the product evaluation with the knowledge gained from the demonstration
- The customer will benefit from a full interactive session with the ability to 'have a go themselves' if desired
- The customer will save time and future discrepancies that may otherwise occur from an unguided, literature based product brief

ENVIRONMENT

The OpenView Storage Mirroring demonstration will consist of:

- All demonstration servers will be installed with MS Windows 2003
- Using HP p-Class Blades and HP ProLiant DL servers
- Two MS Windows 2003 Fileservers acting as replication partners
- An MS Windows XP client machine to demonstrate user experience
