IBM Tivoli Storage Manager Packaged Demonstration

DESCRIPTION

A partner services representative will demonstrate the capabilities of Tivoli Storage Manager 3.2 and how to deploy it to protect data.

DELIVERABLES

Demonstration of the following:

- Installation of the TSM 5.3.2 server
- Installation of the Backup/Archive clients
- Installation of the Integrated Solution Console Administration Center
- Creation of storage pools on disk and tape
- Creation/Management of TSM policies including policy domains, policy sets, management classes, backup copy groups and archive copy groups.
- Using TSM schedules to automate client operations
- Protection of the TSM environment by automating the backup and restore of the TSM databases and storage pools
- Integration of optional data protection agents for popular ERP, database and email applications
- Optional automated space management data file migration (Hierarchical Storage Management — HSM)

CUSTOMER BENEFITS

The customer will benefit from the technical experience and expertise in a guided demonstration.

The customer will have confidence they can proceed with the product evaluation with the knowledge gained from the demonstration.

The customer will benefit from a full interactive session with the ability to 'have a go themselves' if desired.

The customer will save time and future discrepancies that may otherwise occur from an unguided, literature based product brief

ENVIRONMENT

The features of Tivoli Storage Manager will be demonstrated on a partition of an IBM system p550. Multiplatform clients are available including Windows, Linux and AIX. The TSM server will have access to disk pools on an IBM DS4700 storage server and tape pools on an IBM SAN attached TS3200.
